AUTOMATING ACCOUNTS PAYABLE

# Speed invoice cycle times, increase accuracy, and reduce costs

Your AP department faces the daily challenge of processing paperwork quickly and accurately to capitalize on discounts and avoid late fees. **They don't need to do it alone.**

OnBase Content Services brings intelligent invoice processing, workflow automation, and better visibility to the fold of your accounting processes.

- **Achieve straight-through invoice processing** with AI-enabled data capture
- **Automate updates** and reminders for approvals
- **Process and feed data** directly into ERPs and workflows
- **Access invoice lifecycle** and other accounting data from anywhere, at any time

- **Provide vendors** with on-demand self-service through an integrated portal
- **Grant or restrict access** to documents and systems based on roles and needs
- **Automate document retention** and keep a full audit trail
- **Standardize business rules** within AP workflows

Your path to paperless invoice processing

Intelligently capture invoices to reduce manual work while increasing regulation compliance.

| Invoices received in any format—paper, fax, email attachments, XML, PDF | Data captured and matched to back-end information, e.g., line-paring with purchase orders | Validated data transferred to enterprise systems | Invoice automatically routed into appropriate workflow queue | Invoice approved | Payment issued | Invoice image indexed, stored and available from any device |

We get you like we get OnBase

When you equip your OnBase end users with the benefits of System Administrative Services, you also gain immediate access to Platinum Support, our highest level of customer care, at no extra cost.

As your OnBase partners, we are fully equipped to give your AP automations that extra oomph through:

- Implementation
- Training
- Award-winning support
- Managed server hosting
- Administration
- Staff Augmentation
