

CONNECT YOUR HEALTHCARE DATA WITH A **HELIX HANDSHAKE**

Helix is a custom-built connector bridging the gap between OnBase and Kno2. Bring your critical patient, payer, and vendor data from core systems into the most powerful content services solution for healthcare.

OnBase

- Capture patient information, payer, and vendor data from emails, faxes, uploads, scans, and more.
- Securely manage 360-degree access for cloud-boosted content.
- Automate the delivery of patient information through workflows.
- Obtain keen insights into healthcare data and processes.

Kno2

- Locate, send, or receive patient information from core healthcare systems throughout the healthcare ecosystem.
- Enable patient information exchange with EHRs, payers, and beyond.
- Deliver and exchange patient information in any network.

What does OnBase + Kno2 synergy look like?

- Seamlessly deliver external content from Kno2-connected systems to OnBase.
- Improve the value, security, and accessibility of critical healthcare data.
- Simplify the means and method of how systems and people review documents.
- Minimize the time and overhead costs of manually indexing healthcare data.
- Streamline inbound documentation to your entire organization.

**MAKE THE
CONNECTION.
GET STARTED
WITH HELIX.**

Now, anyone with Kno2 can finally take full advantage of OnBase content services for Healthcare data thanks to the Helix connector.

Call us at **864-343-0420** to speak with a knowledgeable engineer about Helix, or book a meeting with our friendly business development specialist to connect Kno2 and continue your automation journey.
